Summary

Results-driven Full Stack Developer with hands-on experience building live surveillance platforms and scalable web applications. Currently working as a Freelance Software Engineer, developing dynamic frontends and backend systems using Next.js, React, Node.js, and Python (FastAPI). Skilled in RESTful APIs, frontend optimization, and scalable application development. Passionate about clean code, rapid technology adaptation, and delivering high-quality web solutions.

Experience

►Coreweb Software Solutions, Jaipur, Rajasthan

December 2025 - Present

Freelance Full Stack Developer

Remote

- Tech Stack: Next.js, Node.js, SQL, Tailwind CSS, Third-party API integration
- Delivered 5+ high-performance portfolio websites by developing secure backend logic and dynamic content management systems.
- Built a scalable B2C business listing directory, managing third-party integrations and database connections (PostgreSQL & Prisma) to ensure reliable content delivery and system stability.
- Implemented server-side rendering (SSR) in Next.js to optimize load times and improve SEO performance.
- Developed reusable, accessible UI components and optimized overall web performance utilizing Next.js (SSR) and Tailwind CSS.

►BM Infotrade PVT. LTD, Jaipur, Rajasthan

October 2025 - April 2026

Full Stack Developer Intern

- Tech Stack: Python, FastAPI, Node.js, MongoDB, MySQL, ReactJS
- Engineered scalable backend logic for "Snoh Vision", a live surveillance platform, ensuring high availability and fault tolerance for real-time data streams.
- Designed robust REST APIs and designed database schemas to handle high-concurrency training logs, model metrics, and automated alert systems.
- Contributed automation features to "Snoh Fusion", including Email Watchers for mailbox monitoring and multi-document invoice processing pipelines with AI-based extraction(OpenAI API).
- Integrated frontend components with backend services to ensure seamless user experience while maintaining strict API security standards.

Technical Expertise

Backend/Database: Node.js, Express.js, FastAPI, MongoDB, MySQL, Mongoose, PostgreSQL, Prisma

Languages: JavaScript, Python, HTML, CSS

System Design: REST APIs, Microservices Architecture, JWT Auth, OOPs, Payment Gateways (Razorpay)

Cloud & Tools: AWS, Microsoft Azure, Git, GitHub, Postman, Socket.io

Frontend: React.js, Next.js, Redux-Toolkit, Tailwind CSS

Soft Skills: Problem Solving, Team Collaboration, Adaptive Learning

Key Projects

►DevBandhan — Developer Collaboration Platform

June - July 2025

Scalable Backend System

GitHub Repo

- Architected a secure backend using Node.js and Express, exposing 10+ RESTful endpoints for user matchmaking and profile management.
- Implemented Socket.io for real-time, bidirectional communication (chat), handling concurrent connections efficiently.
- Designed a MongoDB schema for optimal data retrieval and integrated Razorpay for secure transaction processing.
- Cloud Deployment: Successfully deployed and hosted the complete full-stack application across AWS (EC2) and Microsoft Azure, ensuring high availability and seamless performance.
- Enforced security best practices using JWT authentication, middleware for error handling, and input validation.

Education

►Suresh Gyan Vihar University

2022-2026

Bachelor of Technology, Computer Science and Engineering

Jaipur, Rajasthan

Certifications

►Postman API Fundamentals Student Expert | Postman Academy (API Design & Testing)

2025
